

ESR Weekend Retreat in Wandlitz, Germany, August 24-25, 2019

The last weekend of August the ESRs from both BioCapture and Glycolmaging came together for the ESR Weekend Retreat in Germany. The ESRs of BAM organized a weekend aiming to discuss current issues and questions in a relaxed environment. The weekend started on Saturday afternoon, when all students gathered together at Berlin Central Station to go to the Youth Hostel Wandlitz. A cosy hostel located at the beautiful Wandlitz lake, where it was possible to escape the hot summer weather with a refreshing swim. After brief discussions, the evening was closed with a nice BBQ and a very enjoyable game night. Next day, after breakfast, all ESRs presented their current work stage and future plans and secondments were discussed. After discussions a tasty lunch was enjoyed, after which all returned to the centre Berlin.
