

## Graduate Student Symposium – MIPs, BAM, Berlin, Germany, August, 29-30 August, 2019

Several ESRs from both BioCapture and Glycolmaging participated with a poster or oral presentation to the 8<sup>th</sup> Graduate Student Symposium on Molecular Imprinting. Researchers in the area of molecular imprinting came together to present their work, one example of attendee is Marloes Peeters from Newcastle University: MIP Morphologies, Patterning and Functionalization. The first day ended with a poster session and beer reception followed by symposium dinner, which was held at Ratskeller Köpenick serving typical German food. Here researchers from different universities and companies had the opportunity to network and discuss their difficulties or success of their work. The best presentations were awarded at the end of the conference, to Anil Incel and Shan Jiang two of the Biocapture and Glycolmaging ESRs.
